Create lasting success with fischer Consulting

## A partner for measurable increases in efficiency

**fischer Consulting has assisted companies in optimising their processes based on the in-house fischer ProcessSystem since 2004. The consulting firm provides support with the efficient planning of manufacturing processes, factory layouts and strategy development while helping companies undergo a cultural change to become a forward-looking and sustainably competitive organisation through change management approaches. As part of the global fischer Group of Companies, fischer Consulting draws on its extensive experience with optimisation projects within the company.**

fischerwerke GmbH & Co. KG  
Corporate Communications

Klaus-Fischer-Straße 1  
72178 Waldachtal

Founded in 2004, fischer Consulting utilises the skills of the fischer ProcessSystem, a principle of continuous improvement which was developed in the company based on the Japanese Kaizen work philosophy. It constitutes the basis for providing consultations to companies, suppliers and business partners. The concept focuses on preventing waste while generating added value, with the primary objective of increasing efficiency rather than performance and workload. fischer Consulting was presented with a “Top Innovator in 2020” award for its high innovative power.

Continuous improvement also makes a key contribution to sustainability within the company. The fischer Group of

Companies was presented with the German Sustainability Award in November 2019 in the 'large businesses' category for its commitment in this field.

In addition to working on projects within the fischer Group of Companies, the consultants provide support to customers from a diverse range of industries such as automotive suppliers, construction and construction supply firms. Methods and tools are thereby tested, optimised and continuously developed within the company itself. "Experiences and insights from both external and internal projects therefore mutually benefit each other. This is an invaluable advantage over other consultancy firms", says Prof. Klaus Fischer, owner of the fischer Group of Companies.

### **Smart solutions and transparent results**

Lean processes are the foundation of the efficient implementation of digital transformation within the company, which is why there is an increasing demand for digital consultancy products. fischer Consulting is seizing the opportunities of digitalisation by generating smart solutions for its clients. The Motion Mining process analysis method uses a type of technology that utilises mobile sensors and artificial intelligence. During the process, members of staff wear multiple wearables (sensors) on their body, which provide reproducible and anonymous layered data for analysis. This results in informative data that allows the consultants to determine the measures required to increase process efficiency. fischer Consulting additionally developed an automatic ergonomics analysis camera system based on artificial intelligence. The system collects movements in the workplace and produces reliable data on movement behaviour with the help of artificial intelligence. Analysis processes highlight potential ergonomic improvements.

With its comprehensive range of services and extensive wealth of experience, fischer Consulting is a reliable partner for companies that want to measurably reduce their costs while ensuring their competitive power in the long term.

## **The fischer Group of Companies**

The fischer Group of Companies, headquartered in Waldachtal in Germany's northern Black Forest, generated sales of 872 million euro in 2020 with a worldwide staff of 5,200 employees. The family-owned company operates 50 subsidiaries in 38 countries and exports to more than 120 countries. It includes the five divisions: fischer fixing systems, fischer Automotive, fischertechnik, fischer Consulting and LNT Automation

fischer fixing systems is the technological market leader in key areas of fixing technology. fischer offers products that deliver technical perfection to a wide range of customers, from do-it-yourselfers to tradespeople to key account partners.

fischer Automotive manufactures high-quality parts for vehicle interiors. The company is highly competent in the plastics processing segment and is an important partner for the automotive industry. Its range of products includes air vents, cup holders, trays and multi-function components.

With its construction kits, fischertechnik is active in both the toymaking and the educational sector. fischertechnik is one of the last remaining toy makers to exclusively develop and produce in Germany.

fischer Consulting evolved from the competence developed in the company itself, which includes the fischer ProcessSystem with its central aim of permanent improvement for the ultimate benefit of the customer. fischer Consulting advises small and medium-sized businesses, government agencies and major companies on their path towards lean and efficient processes.

fischer Electronic Solutions develops and manufactures electronic solutions including product and system developments based on the latest technology as well as custom production orders processed in the company's own production facilities. As an experienced provider of development and production services for custom systems such as multi-touch solutions made of glass and the corresponding controller units, fischer Electronic Solutions forms the perfect link between the customer and the final product.
