

Networking and best practice at fischer Consulting

Construction industry gathers under the banner of lean management

fischer Consulting invited representatives of the construction industry to the second customer forum in the northern Black Forest. The agenda included keynote speeches on the opportunities of increasing productivity and quality through lean management as well as the “zero-defects construction site”. The consultancy firm’s event offered a platform for networking and the transfer of knowledge. Best practice tours of fischer’s manufacturing facilities were a particular highlight. As part of the fischer Group of Companies, which includes the renowned fixing products, fischer Consulting provided participants with a crossover into the construction industry.

72178 Waldachtal

The fischer Consulting advisors are familiar with uncertainty when it comes to complex projects. The consultancy firm supports companies and medium-sized enterprises in particular on their path of change towards lean processes in a volatile and digital age. With its knowledge of the fischer ProcessSystem developed in-house, fischer Consulting helps its customers to organise their processes in a lean manner while adapting to current conditions.

Both fischer Consulting consultants and satisfied customers gave speeches on previous relevant experiences in the construction and construction supply industry at the customer

forum at the headquarters in Waldachtal. The keen listeners were given examples of improving productivity and quality and for increasing competitiveness. The presentations on introducing lean management and the speech on 5S on the construction site were also met with rapturous applause. The event was concluded with a presentation of the “zero-defects construction site” approach. The best practice tour through production provided another highlight while focusing on transfer opportunities in the construction industry.

The exclusive network meeting in April 2019 was a successful sequel following the highly successful pilot event two years ago. Decision-makers from almost 20 different companies exchanged experiences and drew inspiration: “We received plenty of ideas and will now try to adapt several topics to our organisation”, said the participant Andreas Heckhausen from the company Vollack GmbH & Co. KG.

Suggestions also came in a digital format: the myCraftnote tradespeople app was showcased at a stall. fischer’s startup has successfully been presenting its digital solution on the market since 2018.

fischer Consulting will continue to offer exchange platforms in future for industry experts and companies interested in lean management.

The fischer Group of Companies

The fischer Group of Companies, headquartered in Waldachtal in Germany's Northern Black Forest, generated sales of 864 million Euros in 2018 with a worldwide staff of 5,200 employees. The family-owned enterprise operates 47 of its companies in 35 countries and exports to more than 100 countries. It includes the five divisions: fischer fixing systems, fischer automotive systems, fischertechnik, fischer consulting and LNT Automation.

fischer fixing systems is the technological market leader in important areas of fixing technology. fischer offers products that deliver technical perfection to a wide range of customers, from do-it-yourselfers to craftsmen to key account partners.

fischer automotive systems manufactures high-quality parts for car interiors. The company is highly competent in the plastics processing segment and is an important partner for the automotive industry. fischer automotive systems produces air vents, cup holders, trays and multi-function components.

fischertechnik is active both in the construction kit and in the educational toy sector. As one of the last toy makers, fischertechnik develops and produces exclusively in Germany.

fischer consulting evolved from the competence and skills developed in the company itself, among these the fischer ProcessSystem with its central aim of permanent and continuous improvement for the ultimate benefit of the customer. fischer consulting advises small and medium-sized businesses, government agencies and major companies on their way towards lean and efficient processes.

LNT Automation develops and manufactures custom electronic solutions. The company also develops, produces and distributes custom and capacitive touch systems such as multi-touch solutions made of glass and the corresponding controller units. All electronics are manufactured in-house.
