

**Press release**

Waldachtal, June 24, 2020

---

fischer Consulting is a “Top Innovator 2020”

## **Creating innovative processes**

**fischer Consulting is among the “TOP 100” most innovative SMEs in Germany, according to an analysis by compamedia GmbH. The consultancy firm provides transnational project support to the fischer Group of Companies, known for its fixing systems. The consultants have also worked with companies working in machinery and plant engineering, industrial goods, supplies and construction for over 15 years. Science journalist Ranga Yogeshwar, a mentor for the “TOP 100” competition, is visibly impressed by fischer Consulting’s performance.**

fischer Consulting GmbH

Klaus-Fischer-Straße 1  
72178 Waldachtal

“fischer Consulting provides quality consulting from a quality brand. We provide our clients with added value in terms of efficiency, responsiveness and costs. We are delighted to receive the award as confirmation of the route we have taken”, says Dr. Christian Fiebig, Managing Director fischer Consulting, who accepted the award on behalf of all fischer Consulting members of staff.

The consulting firm focuses on process analysis and optimisation throughout the entire supply chain. The consultants determine the actions required for implementation through the corporate strategy, allowing companies to achieve tangible results within a short space of time with the help of fischer Consulting. The consultants apply proven lean methods throughout this process.

fischer Consulting also uses the opportunities presented by digitalisation to create smart solutions for its clients. The consultancy firm has cooperated with startups and is taking innovative steps by digitally analysing movement data in areas such as production and logistics, for example. Technology that uses mobile sensors and artificial intelligence is used for process analysis purposes, enabling quick analysis while significantly increasing transparency through precise, high-quality data. This results in objective and informative data which allows the consultants to determine the measures necessary to increase efficiency and improve ergonomic conditions. fischer Consulting has also achieved a tremendous increase in efficiency in other areas with the help of Process Mining, which provides data-based, systematic evaluation of business processes.

The consulting firm's high degree of innovative power significantly contributed to it being presented with the "TOP 100" seal, which a total of 264 companies had applied for. The nominees were assessed and analysed in 120 points. The "TOP 100" seal has been awarded to SMEs for particular innovative strength and above-average successful innovation since 1993.

## **The fischer Group of Companies**

The fischer Group of Companies, headquartered in Waldachtal in Germany's northern Black Forest, generated sales of 887 million Euros in 2019 with a worldwide staff of 5,200 employees. The family-owned company operates 49 subsidiaries in 37 countries and exports to more than 100 countries. It includes the five divisions: fischer fixing systems, fischer automotive, fischertechnik, fischer consulting and LNT Automation.

fischer fixing systems is the technological market leader in important areas of fixing technology. fischer offers products that deliver technical perfection to a wide range of customers, from do-it-yourselfers to craftspeople to key account partners.

fischer automotive manufactures high-quality parts for car interiors. The company is highly competent in the plastics processing segment and is an important partner for the automotive industry. Its range of products includes air vents, cup holders, trays and multi-function components.

With its construction kits, fischertechnik is active in both the toymaking and in the educational sector. fischertechnik is one of the last remaining toy makers to exclusively develop and produce in Germany.

fischer Consulting evolved from the competence developed in the company itself, which includes the fischer ProcessSystem with its central aim of permanent improvement for the ultimate benefit of the customer. fischer Consulting advises small and medium-sized businesses, government agencies and major companies on their path towards lean and efficient processes.

LNT Automation develops and manufactures custom electronic solutions. The company also develops, produces and distributes custom and capacitive touch systems such as multi-touch solutions made of glass and the corresponding controller units. All electronics are manufactured in-house.
