Universal construction kit for beginners by fischertechnik

One for all models – the new universal construction kit by fischertechnik

fischertechnik's models are renowned for their stability. Large models also stand their ground due to fischertechnik's high-quality parts. The new ADVANCED Universal 4 construction kit (69.95 Euro, available from March 2019) opens up a whole new world of opportunities to young constructing engineers: 40 different models can be built with the 490 parts, such as construction site vehicles, spaceships or fairground rides for the next funfair. The universal construction kit by the "Made in Germany" toy manufacturer provides the perfect introduction to the world of fischertechnik as well as technical construction.

fischertechnik GmbH

Klaus-Fischer-Straße 1
72178 Waldachtal

The new Universal 4 construction kit from fischertechnik's ADVANCED product range provides everything that is required for constructing models, above all the classic fischertechnik parts that are used as the fundamental elements for each model. The streamlined design components also enable aerodynamic models, while belt drives, crank handles, cable winches and gears bring movement into the models.

These parts allow the construction of a transport helicopter with a transmission mast, a lorry with a construction site, a snowcat, a flyball governor, a carousel and various different buildings such as high-rises or towers, for example.

The accompanying instructions provide step-by-step descriptions of how constructing with fischertechnik works. The Universal 4 construction kit is suitable for children aged 7 and above and offers a perfect introduction into the world of fischertechnik.

Other fischertechnik sets can also be added on to the universal construction kit: those who want to motorise their models can tackle the fischertechnik motor sets. The PLUS Motor Set XS and motor set XM allow homemade models to be motorised.

Playing is more fun with lighting effects: the PLUS LED Set brings bright lighting effects to the models through two rainbow LEDs. Anyone who wishes to try out the expansion set and requires support can take a look at the instructions, which include descriptions on how to incorporate the PLUS sets.

The fischer group of companies

The fischer group of companies, headquartered in Waldachtal in Germany's Northern Black Forest, generated sales of 812 million Euros in 2017 with a worldwide staff of 5,000 employees. The family-owned enterprise operates 47 of its companies in 35 countries and exports to more than 100 countries. It includes the five divisions: fischer fixing systems, fischer automotive systems, fischertechnik, fischer consulting and LNT Automation.

fischer fixing systems is the technological market leader in important areas of fixing technology. fischer offers products that deliver technical perfection to a wide range of customers, from do-it-yourselfers to craftsmen to key account partners.

fischer automotive systems manufactures high-quality parts for car interiors. The company is highly competent in the plastics processing segment and is an important partner for the automotive industry. fischer automotive systems produces air vents, cup holders, trays and multi-function components.

fischertechnik is active both in the construction kit and in the educational toy sector. As one of the last toy makers, fischertechnik develops and produces exclusively in Germany.

fischer consulting evolved from the competence and skills developed in the company itself, among these the fischer ProcessSystem with its central aim of permanent and continuous improvement for the ultimate benefit of the customer. fischer consulting advises small and medium-sized businesses, government agencies and major companies on their way towards lean and efficient processes.

LNT Automation develops and manufactures custom electronic solutions. The company also develops, produces and distributes custom and capacitive touch systems such as multi-touch solutions made of glass and the corresponding controller units. All electronics are manufactured in-house.
