

Fully functional fischertechnik fire engine

Fire engines for daredevils

The new fischertechnik fire engine lets you experience many fire brigade adventures. Once the model has been built and equipped with a standard PET bottle, nothing stands in the way of firefighting operations. The Firefighter construction kit (89.90 Euro, available from July) is suitable for children aged seven and up.

fischertechnik GmbH

Klaus-Fischer-Straße 1
72178 Waldachtal

Many children dream of extinguishing a fire, which is why fire trucks are a popular feature in many kids' rooms. A self-built vehicle makes playing all the more fun. The impressive vehicles are easily assembled with the child-friendly instructions.

A standard 0.5-litre plastic bottle turns the impressive vehicle into a utility vehicle. The original lid of the PET bottle is replaced by the supplied adapter, which turns the bottle into a water tank that can be used to start actively fighting fires. The connected air pump creates pressure. Once the valve has been opened, water shoots out of the connected fire hoses, giving children a playful grasp of the connection between air and water pressure. Together with the accompanying playing figure called fischertechNik children can dive into many an exciting adventure.

The fischer Group of Companies

The fischer Group of Companies, headquartered in Waldachtal in Germany's northern Black Forest, generated sales of 872 million euro in 2020 with a worldwide staff of 5,200 employees. The family-owned company operates 50 subsidiaries in 38 countries and exports to more than 120 countries. It includes the five divisions: fischer fixing systems, fischer Automotive, fischertechnik, fischer Consulting and LNT Automation

fischer fixing systems is the technological market leader in key areas of fixing technology. fischer offers products that deliver technical perfection to a wide range of customers, from do-it-yourselfers to tradespeople to key account partners.

fischer Automotive manufactures high-quality parts for vehicle interiors. The company is highly competent in the plastics processing segment and is an important partner for the automotive industry. Its range of products includes air vents, cup holders, trays and multi-function components.

With its construction kits, fischertechnik is active in both the toymaking and the educational sector. fischertechnik is one of the last remaining toy makers to exclusively develop and produce in Germany.

fischer Consulting evolved from the competence developed in the company itself, which includes the fischer ProcessSystem with its central aim of permanent improvement for the ultimate benefit of the customer. fischer Consulting advises small and medium-sized businesses, government agencies and major companies on their path towards lean and efficient processes.

fischer Electronic Solutions develops and manufactures electronic solutions including product and system developments based on the latest technology as well as custom production orders processed in the company's own production facilities. As an experienced provider of development and production services for custom systems such as multi-touch solutions made of glass and the corresponding controller units, fischer Electronic Solutions forms the perfect link between the customer and the final product.
